

Ανοιχτή εκδήλωση με θέμα την προσαρμογή των πόλεων στην κλιματική αλλαγή

Τετάρτη 15 Σεπτεμβρίου, 19:00

Open event on the adaptation of cities to climate change

Wednesday September 15th, 19:00

ΕΡΓΑΣΤΗΡΙΟ ΧΩΡΙΚΟΥ, ΑΣΤΙΚΟΥ & ΠΕΡΙΒΑΛΛΟΝΤΙΚΟΥ ΣΥΜΜΕΤΟΧΙΚΟΥ ΣΧΕΔΙΑΣΜΟΥ ΓΙΑ ΤΗΝ ΠΡΟΣΑΡΜΟΓΗ ΣΤΗΝ ΚΛΙΜΑΤΙΚΗ ΑΛΛΑΓΗ

ΠΡΑΣΙΝΟ ΤΑΜΕΙΟ

Το έργο "participatory LAB" χρηματοδοτείται από το Πράσινο Ταμείο στο πλαίσιο του άξονα προτεραιότητας 3: Συμμετοχικότητα Πολιτών «Καινοτόμες δράσεις με τους πολίτες» του χρηματοδοτικού προγράμματος «Φυσικό περιβάλλον & καινοτόμες δράσεις 2020».

Με την στήριξη του / Supported by:
Euro-Mediterranean Centre on Climate Change (CMCC) Foundation

commonsense is a collaborative – interdisciplinary planning and design group active since 2012. Is a Worker Cooperative involved in Urban & Spatial planning and Environmental Management, combining research work and study projects.

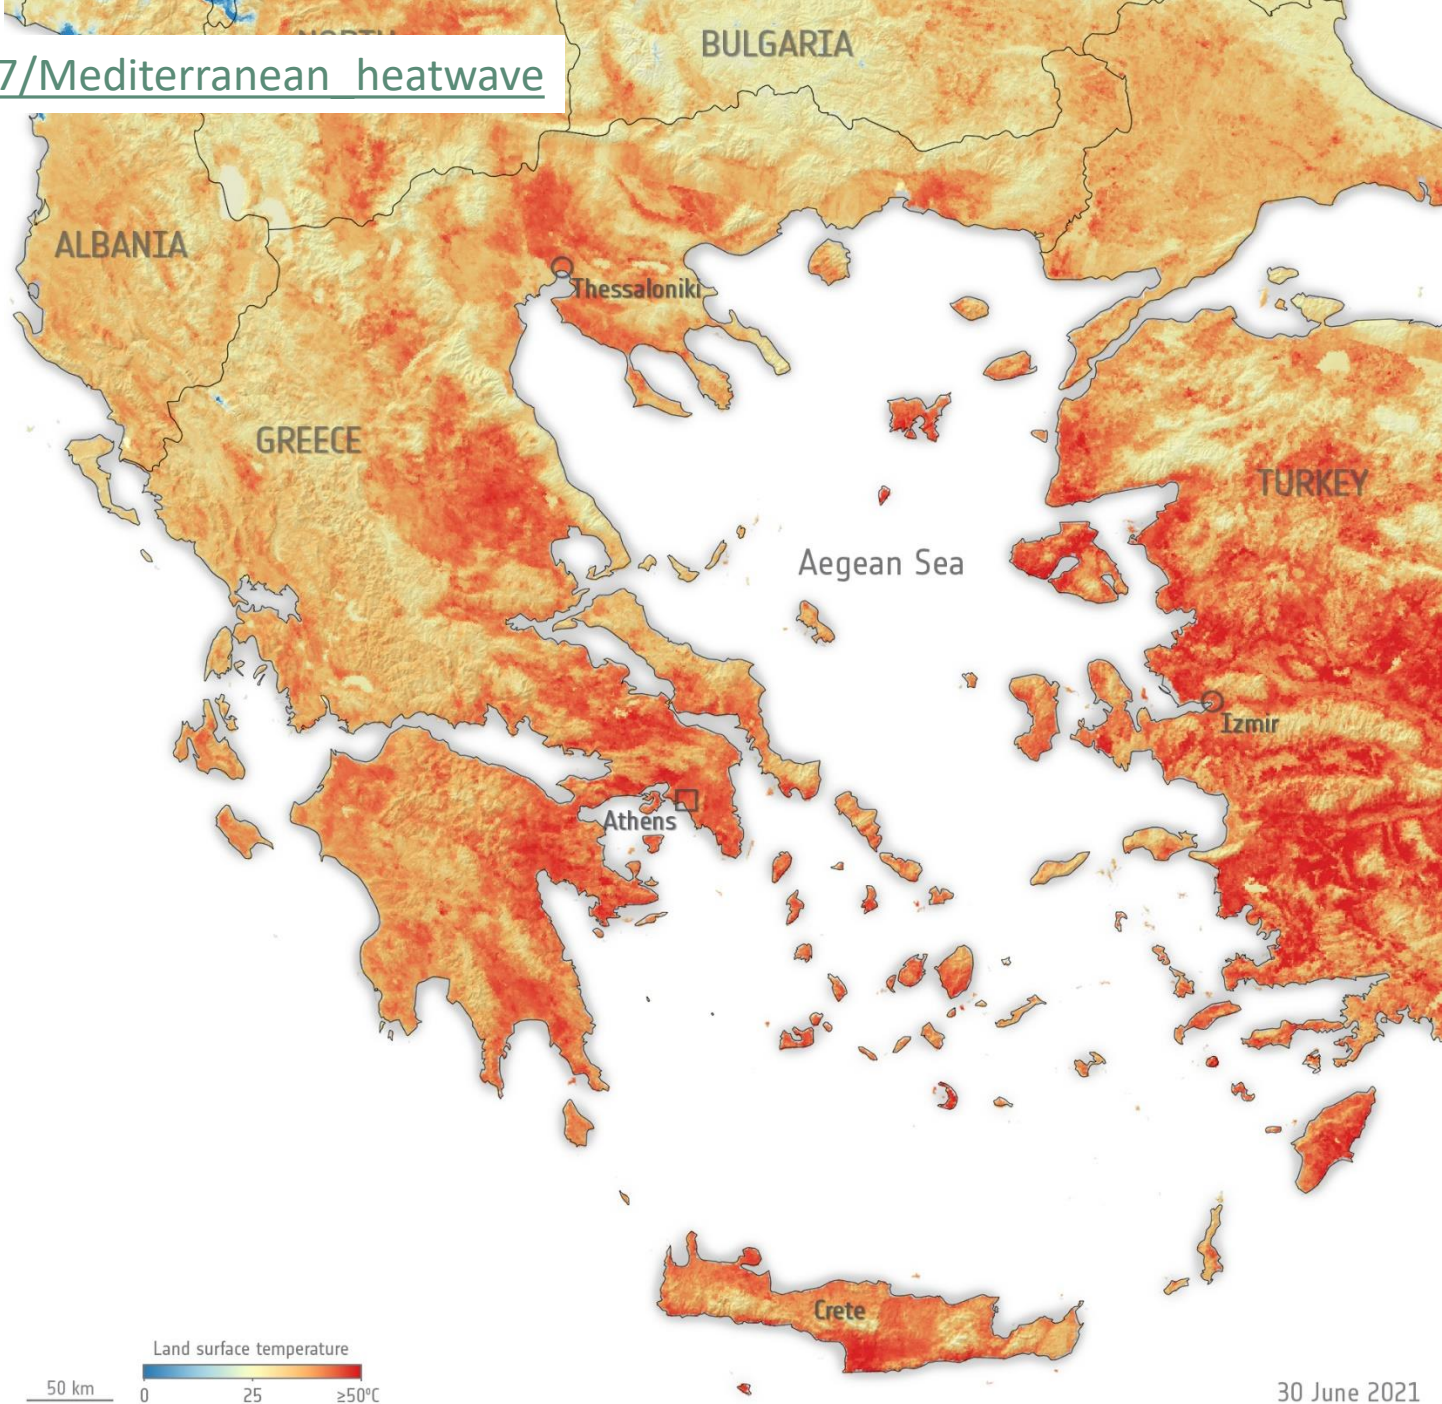

Collaborative function interdisciplinary approach, horizontal organization, collective administration, socially useful projects

https://www.esa.int/ESA_Multimedia/Images/2021/07/Mediterranean_heatwave

«Scorching temperatures hit both Greece and Turkey this week, leading to the temporary closure of the Acropolis – Greece’s most visited monument.

This map shows the land surface temperature of Greece and surrounding countries on 30 June. The data show that surface temperatures reached over 50°C in many locations including the northwest of Athens and many regions in Turkey. The blue spots visible near Albania are clouds.

The map has been generated using the [Copernicus Sentinel-3’s Sea and Land Surface Temperature Radiometer](#). Whereas weather forecasts use predicted air temperatures, the satellite measures the real amount of energy radiating from Earth – therefore this map better represents the real temperature of the land surface.»

BURNT AREAS

NUMBER OF FIRES

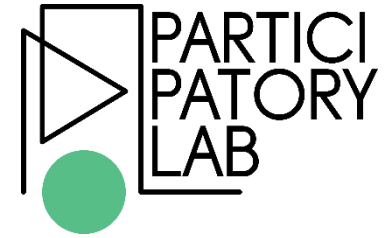

The **participatory LAB** focuses on urban adaptation to climate change, built-environment, urban green areas and NBS.

It aims to create an active interdisciplinary **community** that studies, documents, learns, disseminates, and implements participatory planning processes for the public space. It emphasizes supporting green infrastructure projects and actions and ecosystem-based approaches in urban areas to increase their resilience to climate change.

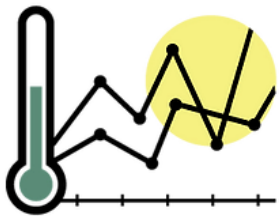

The **Laboratory of Spatial, Urban, and Environmental Participatory Planning for Climate Change Adaptation** consists of scientists and professionals dealing with different, multiple aspects of the subject. It has as its vision the creation and support of a significant community of people in critical positions who place adaptation to climate change and participatory planning at the heart of planning

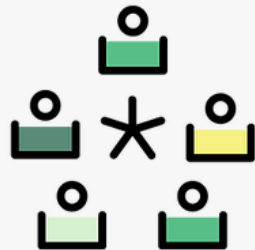

Actions

The actions carried out consist of the community building, capacity building and education, and finally, pilot research applications of Participatory Planning for the Adaptation to Climate Change.

Training of participatory LAB members on Climate Change issues

Training of participatory LAB members in Participatory Planning methodologies and techniques

Capacity Building

Development of an e-guide for Spatial, Urban and Environmental Participatory Planning for Climate Change Adaptation

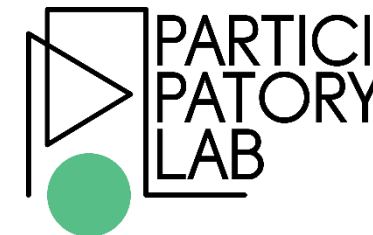

Special e-edition on green infrastructure and NBS (Nature Based Solutions) through co-design method

Training for researchers and 'green' professionals (private and public sector)
