

## #37 – World Inequality database on education

### Short description

**Type of object:** Database

**Source (organisation):** UNESCO

**Issues:** Inequality in education

**Time span:** Depending on country

**Geographical coverage:** Global

**Link:** <https://www.education-inequalities.org/>

### Note/Interpretations

“The World Inequality Database on Education (WIDE) brings together data from Demographic and Health Surveys (DHS), Multiple Indicator Cluster Surveys (MICS), other national household surveys and learning assessments from over 160 countries.

It allows you to compare education outcomes on 3 levels: between countries, between groups within countries, and between overlapping disparities, according to factors that are associated with inequality, including gender, location, wealth, and ethnicity.”
