Note/Interpretations

“The European Social Survey (ESS) is an academically driven cross-national survey that has been conducted across Europe since its establishment in 2001. Every two years, face-to-face interviews are conducted with newly selected, cross-sectional samples. The survey measures the attitudes, beliefs and behaviour patterns of diverse populations in more than thirty nations.”

“The main aims of the ESS are:

- To chart stability and change in social structure, conditions and attitudes in Europe and to interpret how Europe's social, political and moral fabric is changing.
- To achieve and spread higher standards of rigour in cross-national research in the social sciences, including for example, questionnaire design and pre-testing, sampling, data collection, reduction of bias and the reliability of questions.
- To introduce soundly based indicators of national progress, based on citizens' perceptions and judgements of key aspects of their societies.
- To undertake and facilitate the training of European social researchers in comparative quantitative measurement and analysis.
- To improve the visibility and outreach of data on social change among academics, policy makers and the wider public.”

In this report the subjects are: Equality, inequality and social exclusion, Social behaviour and attitudes, Social conditions and indicators, General health and well-being, Political behaviour and attitudes, Political ideology, Minorities, Cultural and national identity, Language and linguistics, Religion and values, Environment and conservation, Specific social services: use and availability, Gender and gender roles, Media
