Meeting ID: 975 2879 7457

Passcode: BH1reG

Description of the session:

Topic: video making.

This P2P session will be led by ULB (WP6) in collaboration with an expert in video making. The topic is “video making”, to provide support to the labs regarding the task T6.4 in which all labs are involved.

The objective of T6.4 is to produce content-based videos that will be grouped in 3 main capsules, focusing on 3 different topics: Inequalities, Co-Production, Scaling.

The ULB team is expected to prepare a blueprint in collaboration with the Brussels Lab. All the other labs are expected to provide video shootings for the capsules, based on this blueprint, along the course of 2025.

The aim of this session is, therefore, i) presenting the blueprint to the Labs and ii) discussing / sharing guidelines, tools, techniques and tips for video making, to better achieve the T6.4 task. For this reason, **the participation of at least 1 representative per Lab is highly recommended.**

Proposed agenda:

- **Presentations (approx 45 mins):**
 - **ULB:** presentation of the task and of capsule structure with topics (15 minutes + Q&A 10 mins)
 - **Video maker:** presentation of the blueprint and provision of tools and tips for shooting (20 mins)
- **Open discussion & working session (approx 45 mins)**
 - **All Labs:** space to discuss and share doubts and challenges, suggestions and ideas about the presentations (40 mins). During this time, the Labs will have the chance to reflect on possible ideas (potential elements to be shot, narrative, visuals) for the video shootings in their context and ask ULB for advice and feedback.
